Getting started

1 Show my usage

See how much energy you've used in your home over time. You can check against different time periods and in real-time. You can see your usage in money (£), kWh and even in CO₂.

2 Control panel

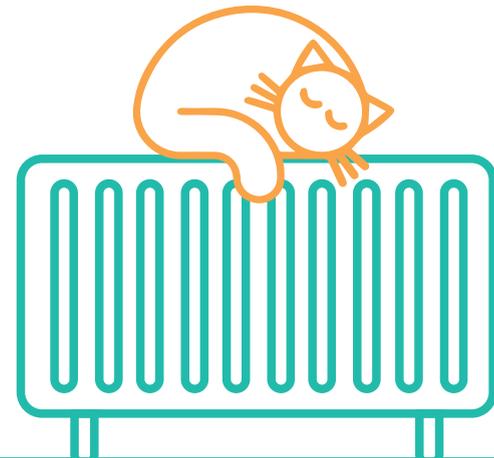

Financial information

This shows what you've spent in the last 7 days along with your tariff information. See when you last topped up and by how much.

Device settings

Change the device settings, including:

- Set alerts and warnings to make sure you don't run out of credit
- Adjust credit protection settings
- Turn off the credit preview on your home screen
- Set do not disturb times for notifications
- Turn on or off the breathe light / sensor proximity
- Change the sound volume
